

aw2.set

aw2.set is used for setting the value.

```
[aw2.set bg_color="#000" /]
```

- We also can set the calculations within aw2.set

For getting answer of calculations we have to use *math* function. eg.

```
[aw2.set add="{aw2.get module.price}+{aw2.get module.tax}" /]  
[aw2.get add.math /]
```
