aw2.wp_mail

This shortcode is used to send out emails. Internally aw2.wp_mail utilizes *wp_mail* function provided by WordPress, to ensure that any other WordPress plugin that uses or modifies wp_mail work with awesome studio framework.

attributes:

- **part:**
  'start' (this is where you put JSON object to specify various email address) | 'message' (this is where you put your HTML message body of the mail) | 'run' when run is set to true only then email is sent, till then it is just assembled

Examples

```
[aw2.wp_mail part=start]
{
"to":"demo@wpoets.com",
"from": "Awesome studio <demo@getawesomewebsites.com>",
"subject":"New Interest for ASF"
}

[/aw2.wp_mail]
[aw2.wp_mail part=message]
 <p class="none">Dear Admin,</p>
 <br/>
 <p class="none">You have an new newsletter request. Please check out the details below.</p>
 <div class="none"><strong>Email ID: </strong>[aw2.get request.newsletter|meta|email /]</div>
 <br/>
<p class="none">Warm regards,</p>
<p class="none">gAW Site</p>
[/aw2.wp_mail]
[aw2.wp_mail part=run][/aw2.wp_mail]
```
